

Table S3 Hazard ratios (95%CI) of incidental detection on thyroid cancer and competing mortality before and after imputation.

	Thyroid cancer mortality	Competing mortality
Before imputation	0.21 (0.04, 1.15)	0.36 (0.13, 0.97)
After imputation	0.14 (0.04, 0.50)	0.47 (0.20, 1.09)
